

Job Description

Design and marketing (Internship)

#We are searching for highly motivated thinkers and innovators who want to build and define a new high-tech software company in a revolutionary new field of data analytics. We are just at the beginning and you have the chance to define and create a new generation company working closely with the founders#

About the company

JoS QUANTUM explores the capabilities and applications of Quantum Computing for the financial industry and develops high performance software and algorithms to enable use and business cases for Risk Management, Fraud Detection, Trading and more.

JoS QUANTUM is approaching cutting edge technology together with clients and provides knowledge-transfer and software development services for enterprises, financial institutions, asset managers and trading companies. To enable quantum applications we provide research-as-a-service to develop relevant business cases.

Qualifications and Experience:

- Preferred current student in an undergraduate or MBA program.
- Work experience in design, marketing and branding.
- Appreciate experience with Inkscape / Gimp / Photoshop.
- Ability to effectively communicate in written and verbal form.
- Excellent time management skills.
- Proficiency in English.
- Ability to relocate to Frankfurt, Germany for the duration of your internship.

What you will do:

- Development of a corporate identity, marketing strategy and customer journey.
- Website design and content management.
- Responsible for developing a cross-channel communication strategy.
- Manage social media content and external presentations.
- Preparation of sales documents, presentations and marketing material.
- Go-your-own way! We strongly encourage and support creativity and self-fulfillment to follow your own ideas.

What we offer:

- JoS QUANTUM is an early stage startup with big ambitions on becoming the major quantum software supplier. With our flat-hierarchies we are innovative on every level and open for every idea.
- You will have 100% responsibility from day one.
- You will not only have flexible working hours. Furthermore, you will work on "trusted flextime".
- A strong learning curve, coaching and feedback cycles on a regular basis.

Apply now by sending us your CV with cover note to career@jos-quantum.de
